## Section 4. Terms of Reference

### A. Overview

Assessments are a reliable way to track student progress. They help educators identify if the required learning has taken place and identify concepts that are misunderstood by students. The evaluation of these assessments is a great tool to support educators to make informed decisions. Hence, the State Council of Educational Research and Training (SCERT) is looking to transform the Teaching and Learning process by creating digitized assessments.

The purpose of this initiative is to ensure that the quality of assessments is improved across the state while empowering govt. school teachers and students to create localized assessments. Additionally, the initiative would ensure that the data collected from the assessments is analyzed and it drives the decision-making process at the zone, block, district and state level.

### B. Detailed Scope of Work

The firm(s) selected through this RfP is expected to deliver their services and work under the guidance of SCERT. The services would include reviewing assessment questions for Grades 6 - 12 and conducting capacity building sessions to equip teachers to create appropriate assessments. The detailed scope of work is as follows:

1. For every subject and grade, a team of Content Specialists (hereafter referred to as Assessment Cell Team, ACT) will be responsible for working under SCERT and closely guided by Government school teachers. This ACT will consist of representatives from the Bidder(s) and from the SCERT.
2. The assessment questions will be created by teachers across the state. The ACT will review the questions for the appropriate grade and subject and ensure that the questions created are aligned with the SCERT, Tamil Nadu State Syllabus.
3. The ACT will review questions created for both English and Tamil medium of instruction.
4. For each question created, the ACT will ensure that the quality of the question, the answer choices, competency, appropriateness, difficulty level and language used is relevant for the grade.
5. Each question will need to be tagged based on difficulty (Easy, medium or hard) and based on competency (Knowledge, Comprehension or Application). An alternative set of tags/ additional set of tags also may be provided during the course of the engagement.
6. The ACT will rate every question based on a predefined criterion and approve or reject a question.
7. The ACT will determine the appropriate use case for each of the questions and tag them appropriately. Every accepted question will be tagged to one of the five use cases of this initiative, which are:
  - a) The QR codes for assessments in the textbook

- b) Periodic practice quizzes conducted in Hi-Tech labs
  - c) Tamil Nadu Vagupparai Nokkin (TNVN) student evaluation
  - d) Generate question papers for summative assessments
  - e) Any other initiative that may be identified in due course
8. Every question that reaches the ACT will first be vetted by a District Key Resource Group (DKRG). The DKRG will be from the District Institutes for Education Training (DIETs/ SRG/ others) or can also be teachers from the district.
  9. In addition to reviewing the questions, the ACT will also design and conduct training (either through videos or physical training methods) to build the capacity of the DKRGs so that they are able to review assessment questions in the long term, i.e. after the engagement with the ACTs is completed.
  10. The ACT will also conduct consultative workshops with Government school teachers to create quality assessment questions.
  11. The ACT will, either as part of the training or otherwise, put in place appropriate processes to ensure that quality assessment questions are generated and capacity building takes place over the course of the engagement.

## B.1. Deliverable and Timelines
